# Growing a life-centered revolution

From LATAM to the world

Confidential deck

GRIDX

To ensure our civilization's prosperity, we must design, deploy, and scale a **life-compatible productive system.**

Ten years ago, we bet  
on creating the  
infrastructure to build  
life-based companies  
from Latin America  
to the world.

# A life-centered fund for a life-based age

Over the past decade, we've led the largest and most successful initiative in Latin America, transforming bioscience knowledge into global-impact startups through two funds.

**+93** Startups built and Invested

**+250** Founders

**+75%** teams with women founders

**1000** People working (700 science)

**\$41M** AUM across 2 funds

# Sourcing in Latam

**+7000** Scientific projects mapped

**AR, BR,  
MX, UY** Local teams

**8 Countries** Represented at the portfolio

## Costa Rica

50 projects mapped  
2 projects invested  
No local team

## Colombia

270 projects mapped  
4 projects invested  
No local team

## Chile

150 projects mapped  
4 projects invested  
No local team

## Paraguay

30 projects mapped  
1 projects invested  
No local team

## Mexico

800 projects mapped  
10 projects invested  
Local team

## Brazil

2.500 projects mapped  
8 projects invested  
Local team

## Uruguay

690 projects mapped  
7 projects invested  
Local team

## Argentina

2.400 projects mapped  
57 projects invested  
Local team

# A tailor-made process for Latam

1.

## Discover

A disruptive life-science mapping initiative  
**(6 months)**

Finding scientific and business talent.

We launch an open call each year, inviting both scientists with promising projects and business entrepreneurs from across the region.

After a thorough evaluation, we select the most outstanding projects and founders.

2.

## Transform

A vision-oriented transformation journey  
**(12 months)**

Transforming science into startups.

**Ignite** We team up scientists with talented entrepreneurs

**Build** Consolidate teams and proposals

**Journey to Fundraising** Connect founding teams with global VC investors

During all this period, we invest up to \$ 400K in different tranches to launch them to the world.

3.

## Grow

An impact-driven focus on real world outcomes  
**(Portfolio Management)**

Connecting our startups to the world.

We complement our portfolio by opening doors around the world and building a regional community with global impact

We also invest up to \$ 1 MM in follow on investments in their Seed and Series A rounds.

# Building a bridge to the world

+60 VC Investors

+\$155MM Raised by portfolio companies

**Caspr is living proof that the GRIDX model works.** Leading CRISPR scientists from Latin America were matched through the GRIDX process with a young, ambitious, and talented entrepreneur. The result was an Argentine startup that developed CRISPR-based diagnostic technology and scaled globally—competing head-to-head with spin-offs from the world’s top CRISPR research institutes. In just a few years, it reached a successful exit, proving that Latin America can build science-based companies ready to compete on the global stage. Caspr is more than a success story; it’s a precedent that validates our ability to turn research into real, scalable impact.

CASPR  
BIOTECH

Biodiversity to transform  
diagnostics with CRISPR

The future of biologicals,  
powered by living fossils

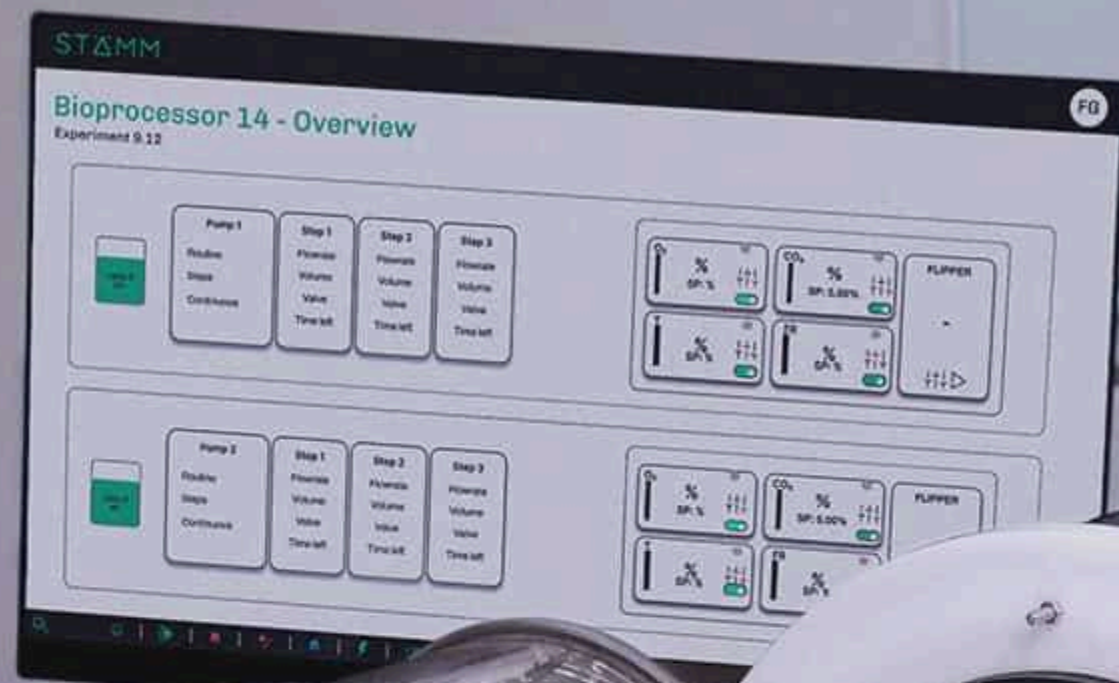

Puna Bio is unlocking nature's most extreme biology to transform agriculture. By harnessing microbes from the high-altitude deserts of the Andes—one of the most biodiverse and extreme environments on Earth—the company is creating a new category of ultra-resilient agricultural biotechnology. Their platform boosts crop performance in degraded and stressed soils, offering a scalable solution to a global challenge. Puna recently closed its Series A round led by Corteva and follow Gates foundation, marking the first investment in Latin America for both—a powerful validation of the region's scientific potential and Puna's world-class technology.

# STÄMM

Infraestructure for a  
life-centered  
productive system

Culture media

Inoculum

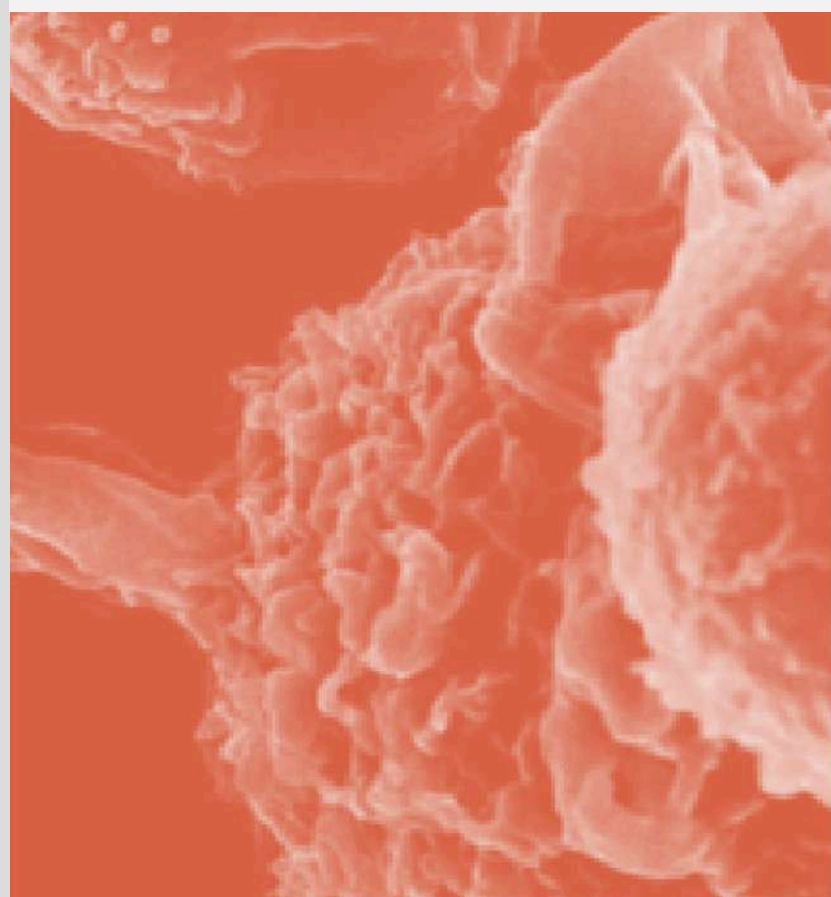

Cells & product

Stämm is redefining what's possible in biomanufacturing. The company developed a globally unique technology that has the potential to forever change how the world approaches fermentation. Through relentless innovation, they've built a proprietary platform that positions them at the forefront of next-generation bioprocessing. With a team of over 250 people and less than USD 50 million in funding—what would have taken hundreds of millions elsewhere—Stämm created a deep tech stack that puts them ahead of global competitors. It's a testament to how breakthrough science, when paired with smart execution, can generate world-class outcomes from Latin America.

Increasing the success of cancer therapy

Oncoprecision created a unique platform using real cells from oncologic patients that allow to discover a new generation of ADCs

Bringing a new paradigm in pollination ecology to improve crop yields

With headquarters in California, USA, Beeflows operates today also in Mexico, Peru, Chile, Argentina and Brazil

Future ingredients made by fungi

Among the only two known companies worldwide engineering colorants through filamentous fungal platforms.

Creating a new category of natural solvents using original eutectic mixes.

Founding scientists are recognized as top researchers in the field of eutectic mixtures. Invested by Syensqo.

We have built a diverse portfolio that, in balance with life, is transforming the means of production in several industries.

## Integrating Biology and Technology

- Data-based Biology (Omics)
- Interface digital-biology
- Genetic Engineering

# Talent

- +200,000 life-sciences researchers
- Cost and availability arbitrage opportunity

QUALITY  
TRADITION

1/5 R&D  
COSTS

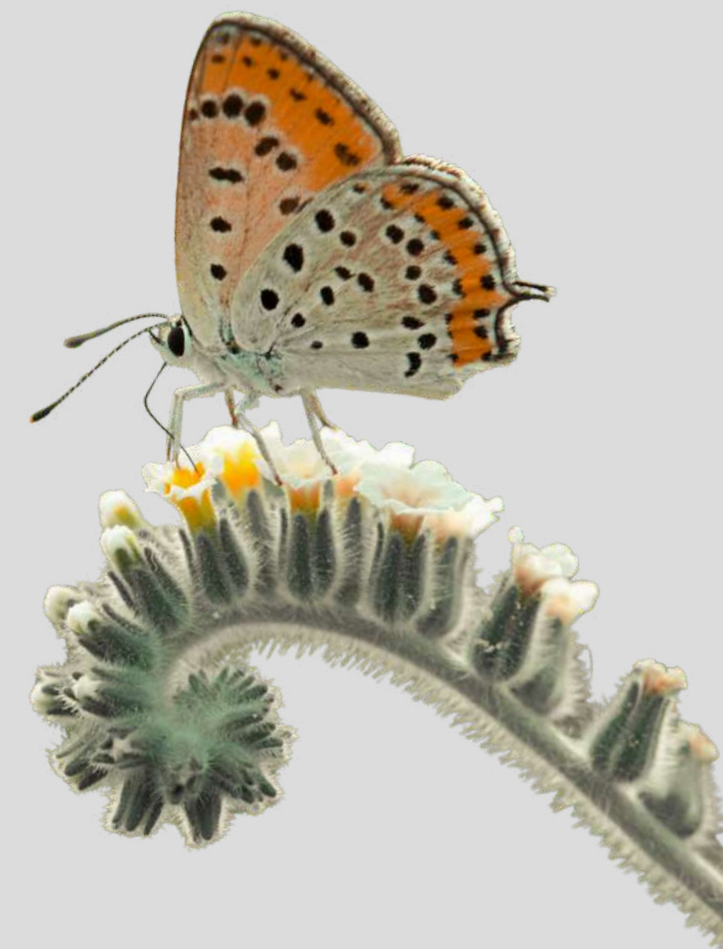

# Nature

- The most biodiverse region in the world
- Access to biomass

# Ecosystem

- Emerging and growing ecosystem of science-based startups

# Leadership Team

**Matías Peire**  
Co-Founder & CEO

25 years building deeptech ventures. Founded GRIDX in 2016 after 3 years of research on science-to-market models. Business grad, Master in Finance, and Singularity University alum (2015).

**PhD María Renner**  
General Partner

Biologist committed to driving global impact via science-based startups. Earned a PhD in Neuroscience in the Netherlands, where she discovered the potential of research to create companies.

**Federico Marque**  
General Partner

5 years as a founder of a biotech startup. Also engaged with the regional entrepreneurial ecosystem, gaining broad startup experience. Industrial engineer. GSP Singularity University (2015).

**Francisco Salvatelli**  
General Partner

Francisco is an Argentine agronomist and business leader based in São Paulo, Brazil. He also serves as Director at the Argentina-Brazil Chamber of Commerce in São Paulo.

**Romina Casadevall**  
Partner

PhD in Biological Sciences. Since 2019, she has been part of GRIDX, identifying high-potential scientific projects and supporting teams through the Company Building program, including investment evaluation.

# International Advisory Board

**Miguel Galuccio**  
Co-founder & Chairman

**Juan Pablo Trujillo**  
Venture Capital & Private Equity

**Paul McEwan**  
Science & Venture Capital

**Sharmila Anandasabapathy**  
Science

The next 10 years  
will be crucial for  
humankind.

Join us in making  
sure LATAM  
becomes as big a  
part of the solution  
as it can be.
